MARKET DULL

BUT STEADY

Southern Pacific, Union Pacific and U. S. Steel Continue Most Attractive—Good Broad Market Looked For—Money Rules Easy in Money Centers.

(By H. H. Bru Co.)

GLOBE, July 26.—The market today was dull, but held very steady and prices were well held. After a little weakness in the opening the market closed at near the best price of the day. Call money rules easy around 2 1/2 to 3 per cent and it is reported that the monetary conditions at Boston, Cincinnati, New York and other centers show a tendency. Good buying of Southern Pacific, Union Pacific, U. S. Steel and Amalgamated continued and it still is rumored that an increase of dividend by the former company is probable.

The easier tone of the grain markets recently has eliminated the fears of material increase of tonnage for the gangsters. Viewing the entire situation looking alarming appears and should good inquiry for copper metal develop, the monetary conditions improve materially, we are likely to witness a good, hard market.

The copper share situation still remains unchanged, and wise people are picking up all kinds of stocks, such as Copper Range, Old Dominion, Mohawk and North Butte. We would also recommend the purchase of Greene-Cannan, Superior & Pittsburg, Boston Consolidated, Butte Coalition, Michigan and Nevada Consolidated. Of the local ones, Globe Consolidated and Superior & Butte are the most active and look strong.

ARIZONA HAPPENINGS AS CULLED FROM EXCHANGES

A special to the Review from Naco says that H. J. Temple, superintendent of the Cananea, Yaqui River & Pacific railroad, returned from Naco, where he went in the interest of the Randolph lines in that section, as a result of the clash which occurred at Naco last week over the right of way. M. R. Temple remained on the ground after the departure of Secretary of State Sr. Cabillas.

When interviewed by a Review representative, the superintendent of the Cananea, Yaqui River & Pacific closed up like a clam and had nothing to say for publication. It is learned, however, that the Randolph lines are expecting that the injunction will be dissolved during the course of the next fifteen days. In the meantime the work of clearing the right of way for the C. Y. R. & P. railroad at Naco is at a standstill.

Colonel W. C. Greene passed through Bisbee in his private car Verde, on his way from Chihuahua to Cananea, where he will spend the next few days looking after his interests in that section. Although the colonel has been steadily increasing in weight until at the present time he tips the scales at very nearly 260 pounds, he is still very active, as is evidenced by the fact that while visiting his timber holdings in Chihuahua he rode sixty miles in one day over mountain roads, and at the end of the trip was less fatigued than any one of the party, although the others were young men.—Bisbee Review.

A LIME AND CEMENT INDUSTRY FOR ARIZONA

Surveyor General Ingalls has approved mineral survey No. 2234, comprising twenty lime and cement claims, filed on by the Grand Canyon Lime & Cement company.

The twenty claims comprise approximately 400 acres of land and lie in an unorganized mining district near the Grand Canyon. The Grand Canyon Lime & Cement company is a powerful corporation, composed of the most part of Los Angeles capitalists and business men. For some time they have been shipping lime to California and already have five kilns in operation.

It is their purpose to furnish Arizona, New Mexico and southern California with lime and cement, says the Phoenix Gazette. The field is a large one and undoubtedly they will find an ample market for their product.

The claims are natural sites for the making of cement and the quarrying of lime. All the ingredients of the best grade of Portland cement are right on the ground.

The company will doubtless exert the widest influence upon the prosperity of the territory. Besides furnishing employment for a large number of workmen and thus laying the foundation of an important city, they will furnish lime and cement to the southwest at a figure far below the present rate.

The district in which the claims are located has always been known as a placer country, but no mines of any importance have ever been found there. Indeed, the land seems to be worthless except for the making of cement. In a short time Arizona will be supplied with cement manufactured within her own boundaries and the government plant at Roosevelt will not be the only cement factory in the territory.

The copy of the motion which was filed at Tombstone was served upon E. E. Ellinwood, attorney for the E. P. & S. W. railroad, at his office yesterday. The motion for dissolution is a voluminous document covering more than fifty pages of typewritten matter and is supported by numerous affidavits of the pickets, against whom the injunction was issued, to the effect that the allegations of the complaint filed in the district court by the railroad company are totally and wholly false.

Attached to the motion for dissolution is also a copy of the testimony introduced at the trial by one C. O. White at Lowell on a charge of unlawful assembly.—Bisbee Review.

A private car of George Gould, the railway magnate, is to arrive in Tombstone today, bearing a party of Columbia university students and instructors who are making a visit of Arizona mining sections to study the mineralization and general mining conditions. The distinguished party is composed of Kingston Gould, George Danahy of New York, Rush Estes of Montpelier, Vt., Arthur Hamilton of New York and a cousin of Kingston Gould. All are senior students of the famous university. The instructors are Dr. Charles P. Berkeley, instructor of geology and of the faculty at Columbia, and Dr. Frederick Kruse, an eminent mining engineer of Central City, Colo. The party will probably stay here several days and look over the mines and pumping plant of the T. C. M. Co., and see the coming greatest and biggest producing camp in the west.—Tombstone Prospector.

A report reached Tombstone last evening of the desperate act of a Mexican woman residing at Naco, who, being despondent at being jilted by her spouse, deliberately poured coal oil on her dress and ignited the same. The flames were put out by friends, but not before she was badly burned and it is feared may die yet as a result of her suicidal act.—Tombstone Prospector.

The date of the excursion to Prescott has been changed, but there will be one nevertheless without fail. The excursion was to have been run on Sunday, August 4, but since Manager Taylor will not be able to arrange a game with Phoenix on that day, because of previous entanglements with Humboldt, the battle with Curly's swatters will be called on the following Sunday, August 11. Prescott is arranging for quite a

baseballfest, beginning Sunday with Humboldt. On the next week a five-day session of baseball will be held, if everything works out as planned, with Fort Wingate of New Mexico, which has a fast aggregation of sluggers. After this preliminary practice Prescott will be ready for Curly's so-called sand crabs on the 11th. Morty Graham, who was played on second base at Prescott Sunday against Humboldt, will go up to assist the Prescottites in a series with Fort Wingate and also against Humboldt if the games come off as scheduled. Prescott has an eye on Morty, but the Athletics will have him in line when the game is played next month.

Tom Farish arrived here yesterday from Globe, near which point he has been employed on a mining property being opened up by his father, T. E. Farish. Last night Tom and his brother, W. A. Farish, left for Ocean Park, Cal., where Mrs. W. A. Farish and baby are spending the summer. The gentlemen expect to be gone about a month.—Phoenix Republican.

WORK PROGRESSING RAPIDLY AT BIG ROOSEVELT DAM

W. D. Alexander passed through Phoenix en route to Chihuahua, Mexico. Alexander has been in charge of the electrical department of the government cement mill at Roosevelt, and is going to Mexico to take charge of installing a reduction plant about fifty miles up the Fuertes river in the state of Chihuahua for the Telluride company, says the Democrat.

Regarding the work on the dam at Roosevelt, Alexander says that at present operations are proceeding satisfactorily, though they have been greatly retarded by the scarcity of labor. Contractors are shipping men to Roosevelt, wherever they can get them, from Galveston to San Francisco. Although the working force is still below the maximum, they are sufficient to tax the sand crusher, which prepares gravel for the concrete to its fullest capacity.

In the event of having a materially larger body of laborers, a sand reservoir would be necessary.

Speaking of the diversion dam, Alexander says that it is hardly up to the level of the river, but it is progressing rapidly. The coffer dam is sound and in good shape, and the main dam sufficiently advanced to permit of their dumping earth between it and the coffer dam.

Alexander says that no uneasiness is felt at Tombstone concerning possible damage from floods. The contractors feel positive that the work has advanced to a point where nothing short of a record-breaking deluge can result in seriously retarding the work on hand.

Alexander also stated that a third stone quarry is to be opened in the next few days in order to facilitate the stone work now well under way.

Van Wagenen, next door to the post office, does a general painting and paper hanging business. All work guaranteed.

Keegan's is one of Globe's oldest and best known cafes; everything first-class in his line. Call and be convinced.
